Other Features

Flexible Premium Payment Modes

You have an option to pay premiums Annually, Semi-annually or Monthly. Monthly mode is allowed only if the premiums are paid electronically, like Credit Card, Direct Debit and ECS/NACH. Loading on premium will be applicable as per the table given below

Premium Modes	Annual	Semi-annual	Monthly
Factors	1	0.51	0.086

Grace Period

If you are unable to pay your premium by the due date, you will be given a grace period of 30 days for all modes. During the grace period the Policy shall continue to remain in-force along with all benefits under this policy and claim, if any, shall be payable subject to deduction of the unpaid due premium till date of death.

Premium Discontinuance

The Policy shall acquire a Surrender Value after payment of Premium for at least first two consecutive policy years in full.

If you discontinue the payment of premiums before your Policy has acquired a Surrender Value, your Policy will lapse at the end of the grace period, the Death Benefit will cease immediately and no benefits will be paid when the Policy is in lapsed status.

If the Policy has acquired a Surrender Value and no future premiums are paid, you may choose to continue your Policy on Reduced Paid-up basis.

On your Policy becoming Reduced Paid-up, benefits under the plan will be reduced as given below:

Benefit	Payout
On Death	Paid-up Factor (multiplied by) Sum Assured on Death [^] plus Annual Guaranteed Additions accrued till the date of last unpaid premium
On Maturity	<p>a) Paid-up Factor (multiplied by) Guaranteed Income payable during the payout period; plus</p> <p>b) Savings Booster, payable at the end of the payout period. For Reduced paid up policies, savings booster is defined as accrued AGAs, as at the end of last unpaid premium, (multiplied by) applicable SBM</p> <p>In case the beneficiary opts to take the maturity benefit as one time lump sum amount at the time of maturity (or payout period) then the maturity benefit for a reduced paid up policy would be as follows:</p> <ol style="list-style-type: none"> Sum of remaining guaranteed income as defined in “(a)” above (multiplied by) applicable lump sum factor; plus Savings Booster, payable along with the lump sum. For such reduced paid up policies, savings booster is defined as accrued AGAs, as at the end of last unpaid premium, (multiplied by) applicable SBM.

Paid-up Factor = Number of premiums paid/Number of premiums payable

[^]Sum Assured on Death shall be applicable as per variant option chosen as defined above

Revival

You can revive your lapsed/Paid-up policy for its full coverage within five years from the due date of the first unpaid premium but before policy maturity, by paying all outstanding premiums together with the interest, as applicable. The interest for revival of the policy will be charged at market related rates set by the Company from time to time. The rate of interest shall be reset on an annual basis at the beginning of every financial year (April) and would be determined based on the average of 10-year G-Sec YTM plus 75 bps rounded down to 25 bps. The average of the benchmark would be taken from the previous financial year for the period 1st July to 31st Dec. The source of information for 10 year GSec rate would be “CCIL”. The current applicable rate of interest on policy reinstatement is 8.00% p.a. compounding monthly which would be applicable for the FY 2023-24. Revival of the policy is subject to Board approved underwriting policy, i.e. the Life Insured may have to undergo medical tests, financial underwriting etc. Upon revival of the Policy, the policyholder will become entitled to full Annual Guaranteed Additions for the policy year(s) while the policy was in paid up/lapse stage. If a lapsed policy is not revived within the revival period, the policy will terminate on expiry of the revival period.

Surrender

It is advisable to pay premiums for the entire premium payment term to enjoy maximum benefits under the policy. If your Policy acquired a Surrender Value, on payment of at least first two full years’ premium and you choose to discontinue your policy, you will be entitled to receive Surrender Value which will be higher of the Guaranteed Surrender Value (GSV) or Special Surrender Value (SSV) of the Policy. Please refer to our website or policy document for details.

Loan

You may take a loan against your Policy once it has acquired a Surrender Value. The maximum loan that can be availed is 75% of the Surrender Value. The rate of interest shall be reset on an annual basis at the beginning of every financial year. The rate of interest applicable on the loan will be declared by the Company on an annual basis at the beginning of every financial year. The loan rate of interest is based on yield on 10-years GSEC YTM plus 150 bps rounded down to 25 bps. The average of the benchmark would be taken from the previous financial year for the period 1st July to 31st Dec. The source of information for 10 year GSec rate would be “CCIL”. The current applicable rate of interest for FY 2023-24 is 8.75% p.a. compounding monthly. Any outstanding loan amount together with any unpaid interest thereon shall be adjusted against any Policy Benefit which become payable during the policy term. For other than in-force and fully paid up policies: In case outstanding loan amount including interest exceeds the surrender value, the policy will get foreclosed after giving intimation and reasonable opportunity to the policyholder to continue the policy.

Policies in-force for full benefits or fully paid policies would not be foreclosed on the account of outstanding loan amount (including outstanding interest on loan, if any) exceeding the surrender value.
